

Click once to see the flyout of objects or wall types you can draw. Don't forget to look through the options.

Move/adjust allows you to resize objects lengths or widths by stretching a side.

Move/group allows you to move whole objects or groups of objects selected. Slightly different from the move/adjust tool.

Flip layers on and off to draw on separate floors or to see existing drawings (floor plans, section, etc).

Sketch tool draws sketch lines that can be used to verify measurements and provide drawing blocks that do not count in the grading of the vignette.

Ortho allows for 90 degree snapping.

Get ready to use this a lot manually, b/c there is no zoom wheel.
